PHILADELPHIA, APRIL 15, 1926.

TRADE CONDITIONS: Delayed buying on the part of the farmer has resulted in a quiet but steady demand for field seeds. Emergency calls to supply late buyers are coming from all sections. Philadelphia has the advantage of a great industrial center in loading full cars daily for most interior points. It is a part of our service to study traffic conditions so as to ship from that freight station which will insure quickest movement to the customer.

LAWN SEED: Because we handle in large quantity all items that go into lawn grass mixtures, we are well fitted to supply superior grades at the lowest possible prices. Demand increases from year to year. Merchants should have a care lest they lose their proportion of this profitable business.

RED CLOVER: Lower market on French grown seed reflects the result of large imports and the delayed demand. Stocks Domestic seed are comparatively small and market continues firm. Are glad to ship in small lots as wanted in order to relieve dealers of the risk of carrying over stocks.

ALFALFA: Market about unchanged. Farmers should be encouraged to use Certified stock this year account of the reasonable prices prevailing.

ALSYKE: Stocks are small; the finest qualities are almost exhausted.

SWEET CLOVER: Demand is large throughout the country. Prices are still quite attractive.

SEED GRAINS: Note list of seed grains which we carry in stock and are prepared to ship promptly.

SOJA BEANS: Demand for Soja Beans is increasing. Experiment Station officials are recommending the use of Soja Beans widely this year account of the low prices prevailing.

SEED POTATOES: Scarcity of stocks has resulted in very high prices. Account abnormal market conditions prevailing we advise caution. We suggest you 'phone for prices when needing stocks.
